Addis Ababa, Addis Ababa

## Summary

Competent software engineer, able to work effectively in a fast-paced, agile environment, and passionate about developing software architecture for primarily web applications.

---

## Experience

### full stack web developer

EpicTech • Addis Ababa, Addis Ababa

06/2023 - Present

- Proficient in full-stack web development, implementing solutions with React, Node.js, and MySQL for robust website functionality.
- Adept in network infrastructure and support, ensuring optimal system performance and user connectivity.
- Collaborative team player, contributing to multiple projects harnessing machine learning and artificial intelligence technologies.
- Experienced in the education tech sector, enhancing learning systems through innovative web and software applications.
- Recognized for developing efficient testing processes and resolving system crashes swiftly, significantly improving operational productivity.

### Web Developer

Intern web developer • Addis Ababa, Addis Ababa

06/2023 - 01/2024

- Spearheaded the development of clones for major websites such as Amazon, Netflix, and Apple using React, Node.js, Express, and MySQL, enhancing my full-stack development expertise.
- Initiated and launched Ethio-Coders, a question-and-answer platform for the Ethiopian coding community, facilitating knowledge sharing and collaborative problem-solving.
- Crafted a range of small-scale applications, including a calculator, an image selector with zoom functionality, and a weather forecasting tool, sharpening my programming and UI design skills.

### Electrical and computer Engineer

IT NETWORK • Addis Ababa, Addis Ababa

07/2023 - 10/2023

- At Equatorial Business Group, I played a key role in setting up and maintaining computer hardware and network systems, focusing on efficiency and reliability.
  - I gained expertise in Uninterruptible Power Supply (UPS) systems, deepening my understanding of power solutions in business environments.
  - My work included implementing and maintaining CCTV systems, which expanded my knowledge of security technologies.
  - Collaborating with the IT department, I helped diagnose and resolve a variety of technical issues, providing consistent user support.
-
